## PVC NYLON BRAIDED PIPE

### **PVC Braided Hoses**

PVC Braided Hoses made from high quality thermoplastic compound and reinforced (braided) with high tenacity synthetic yarn (crosswise - lengthwise). The excellent ply adhesion and bonding between the inner and upper layer of PVC ensures a durable pipe. The braiding gives the hose high strength and resistance to withstand high pressure and elongation. Our production of hoses meets the most stringent operational requirements.

Transparent hoses facilitate the location of blockage in use. The smooth inner bore prevents any build - up and offers minimum resistance to flow. The working pressure of the hose is dependent on temperature and is lowered with increase in temperature. Available in various grades as Clear Transparent, Super Spray (Car Washing), Agricultural Pesticide, Green Garden Water, Sanitary, Fire Fighting, Rock Drill, Welding etc.

**Features:** Withstand high pressure, Light weight compared to rubber hose, Clear transparent, Working temperature up to 60 o C, High flexibility, Long working life and durability, Chemical and abrasion resistance, Excellent ply adhesion, Crush and kink resistance, Opaque if required, Rodent proof

A large coil of green braided PVC hose is shown, secured with red ties. The hose has a distinct diamond-shaped braided pattern. The image is framed by a red vertical bar on the left and a blue vertical bar on the right.
